and weight scale in one

What health care
providers say ...

Testimonial

“Our clinic has used the UpScale for exams on hundreds of patients of all abilities. It is easy to use and it has made a dramatic difference in the exam experience for patients and staff. Many of our patients have difficulty climbing onto exam tables and standing on scales. The UpScale eliminates that issue seamlessly, helping us with ADA/504 compliance, patient safety and quality improvement.”

“We strongly endorse the UpScale.”

Diane Weissman, MD
Acting Medical Director/Family Practice Physician
NATIVE HEALTH and NHW Community Health Center

Why choose UpScale?

ADA Compliance

Accessibility lawsuits are increasing. ADA compliance isn't optional, and it's the right thing to do. Medical equipment must be accessible to all patients.

Two Products in One

Combines a height-adjustable exam table with an accessible weight scale to save money and save space.

Patient-Centered, Universal Design

Allows better preventive and diagnostic care for ALL patients, regardless of mobility.

Easier on Staff

Helps reduce injuries to staff caused by lifting and maneuvering patients onto tables and scales.

Good for Business

Attracts patients, streamlines patient flow and helps healthcare providers stand out from the crowd.

Tax Credit

ADA tax credit for qualified buyers brings compliance within reach.

Enhances Privacy

Allows for patient weight and measurement to be taken in the exam room, rather than the hallway.

It's the Right Thing to Do

Brings dignity back to the exam room, enhances the exam experience for staff and patients, and improves compliance.
