Our goal is to make the historic aerial library available to the public via the Atlantic County Site Investigator and Internet Mapping Service website.

- The collection was obtained and developed through various sources, as well as, scanned by ACOGIS from film or photograph and georeferenced in house.
- The digital collections cover the entire county of Atlantic and can be incorporated with other GIS layers for further analysis.
- Currently the historic aerial library may be viewed via appointment only, by scheduling at http://www.aclink.org/planning/mainpages/arcims.asp

Coming soon to the:
