COVID-19 Vaccine for Children and Teens

Everyone ages 5 and older can get a COVID-19 vaccine*

Vaccination is important because it can help:

Protect family members and those who can't get vaccinated

Prevent the spread of COVID-19 in schools and communities
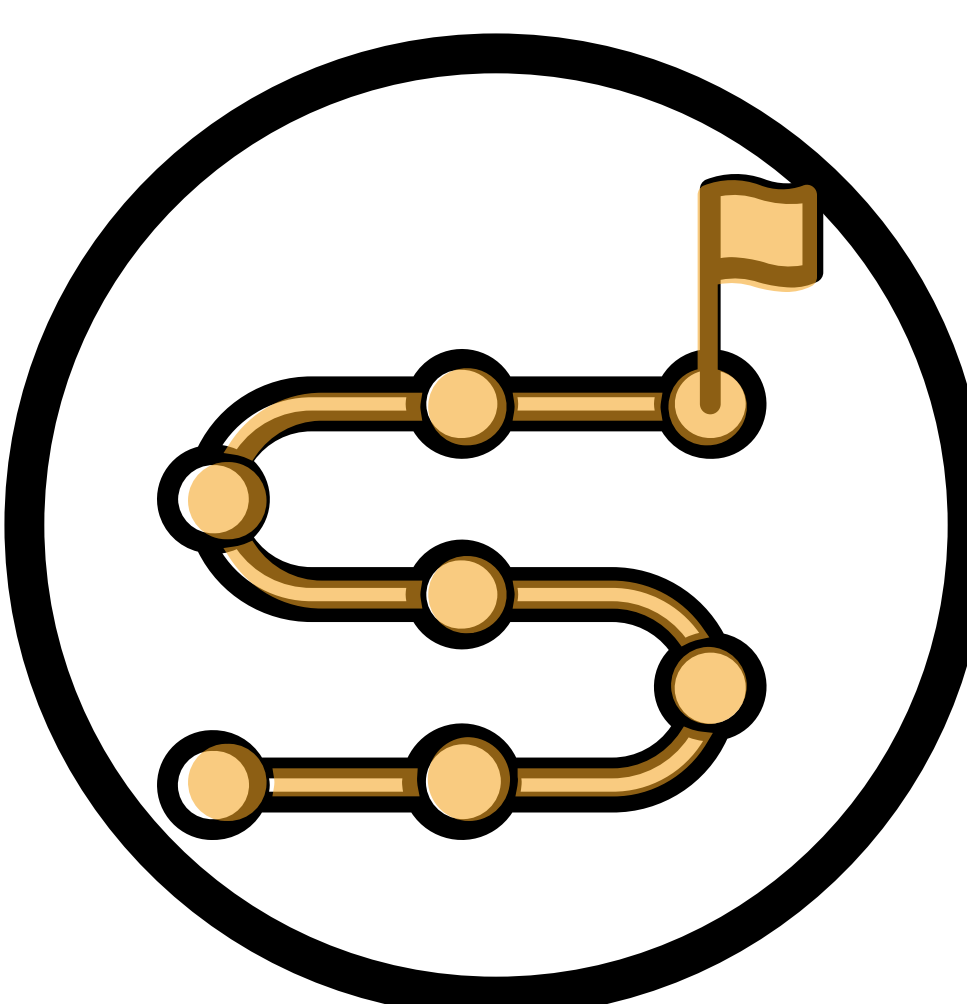

Prevent serious health issues such as MIS-C**

Keep kids in school for in-person learning

Bring back sports, play-dates, and activities

End the pandemic and return to normal activities

Get vaccinated: covid19.nj.gov/finder

For more information: nj.gov/health
Vaccines are free regardless of insurance or immigration status.
