

Protect Yourself & Others: Get Vaccinated

Everyone 6 months of age and older should get a flu shot every year. Adults age 65 and older, children younger than 5, pregnant people, and those with chronic health conditions such as kidney disease, asthma, diabetes, and heart disease are at greater risk for developing serious flu complications. Getting vaccinated can reduce flu illnesses, doctor visits, missed work and school, and prevent hospitalization and death.

In addition to the recommended yearly flu shot, you can help stop the spread of germs:

- Cover coughs and sneezes.
- Wash hands frequently.
- Avoid touching your eyes, nose and mouth.
- Clean and disinfect commonly touched surfaces.
- Avoid close contact with persons who are sick.
- Stay home when you are sick.

Protéjase y Proteja a los Demás: Vacúnese

Todas las personas a partir de los 6 meses de edad deben vacunarse contra la gripe todos los años. Adultos de 65 años o más, niños menores de 5 años, personas embarazadas y personas con Las condiciones de salud crónicas, como la enfermedad renal, el asma, la diabetes y las enfermedades cardíacas, tienen un mayor riesgo de desarrollar complicaciones graves por la gripe.

Vacunarse puede reducir las enfermedades gripales, las visitas al médico, las ausencias laborales y escolares, y prevenir la hospitalización y la muerte.

Además de la vacuna anual contra la gripe recomendada, usted puede ayudar a detener la propagación de gérmenes:

- Cubra la tos y los estornudos.
- Lávese las manos con frecuencia.
- Evitar tocarse los ojos, la nariz y la boca.
- Limpiar y desinfectar las superficies que se tocan comúnmente.
- Evite el contacto cercano con personas enfermas.
- Quédese en casa cuando esta enfermo.
